

Usability Test Overview

4/23/14

Our first usability test. Our tester was not a fan of our greyscale site, said it was too boring, needed more color and images. User was unsettled by the fact that she had to log in after registering, we should auto-login after account creation.

User had trouble creating an event because when time formatting was wrong it just failed to create an event, no error messages popped up, this may be my fault. Lets look into that.

User could not find the place to share her schedule from the main calendar page, we could make that clearer but at the same time it's not extremely crucial and I think it may be fine in the edit menu.

User was not able to remove friends as we have not implemented that feature yet.
